Thank you for purchasing our 10000mAh Wireless
Charging Power Bank with LED Display.

Included in this document are technical specifications
of the Powerbank and instructions for use.

Before using this product please read the manual
carefully

FEATURES

- 5W Wireless charging pad and powerbank in 1, no more tangled charging cables
- 10,000 mAh power output for fast and efficient charging, up to 5X battery life
- Charge 3 devices simultaneously with 2 USB ports and wireless charging pad
- Advanced LED display to indicate battery capacity at all times
- Built-in safety system to protect your devices against excessive current, overheating, and overcharging
- Anti-Slip wireless charging pad to keep device stable

PACKAGE CONTENTS:

1X Jarv 10,000mAh Wireless Charging Power Bank with LED Display

1X Charging Cable

1X Users Guide

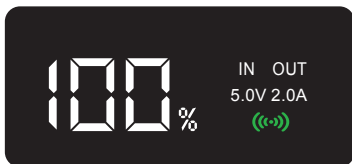

SPECIFICATION:

Capacity:	10,000mAh
Type of Battery:	Polymer lithium ion battery
Input:	DC 5V/2.0A, Type-C 5V/2.0A
Output:	DC 5V/2.0A
Wireless Output:	DC 5V/1.0A
Size:	5.3X2.75X0.7 in
Weight:	7.4 oz

WIRELESS CHARGING PAD OVERVIEW:

LED DISPLAY GUIDE:

IN	Powerbank is being charged via the Micro USB or Type C Input port
OUT	Powerbank is not being charged and is ready for use
5.0V 2.0A	Powerbank is in use via the 2 available USB Output ports
(((•)))	Wireless Charging is in use
100%	Indicates Battery capacity

GETTING STARTED:

1. Press the Power button briefly to **POWER ON** the Powerbank. The LED display will light up to indicate battery capacity.
2. The power bank will automatically power off when not in use for more than 25 seconds.

CHARGING THE POWERBANK:

1. Connect your Power bank using the included Micro USB cable or your Type-C Cable to a PC USB port or AC power adaptor (Max. support 2A). When connected correctly, the power bank will automatically start charging and battery capacity will be displayed on the LED screen.
- 2.The battery capacity will be displayed as 100% once fully charged.
3. When the power bank is fully charged, disconnect the USB cable from the Powerbank.

To check battery capacity when the powerbank is OFF, please press the Power button once.

CHARGING USB POWERED DEVICES:

This powerbank is able to charge most USB powered devices

1. Plug your USB cable into the Powerbank USB Output port.
2. Plug the other end of the cable in your device
3. When connected correctly, the connected device will automatically start charging.
4. Once charging is complete, simply unplug your device and disconnect the cable from the power bank
5. If no device is being charged, the Powerbank will turn off automatically after 25 seconds.

WIRELESS CHARGING OF Qi ENABLED DEVICES:

This Powerbank works with most Qi enabled devices

1. Place your Qi-enabled device on the wireless charging pad. Make sure the center of the device is aligned over the center of the charging base. Charging will begin on contact.
2. The green indicator symbol “” will turn on to indicate a wireless device is being charged. If this symbol does not turn on, please make sure your device is properly aligned to the wireless charging pad.
3. If no charging load is placed on the device, the Powerbank will turn off automatically after 25 seconds.

**DO NOT PUT ANY METAL OR MAGNETS BETWEEN
THE POWER BANK AND CHARGING DEVICE WHILE
CHARGING WIRELESSLY**

WARNING AND PRECAUTIONS:

- Keep your Powerbank dry and away from moisture and corrosive materials.
- Do not clean your Powerbank with harsh chemicals, soaps or detergents. Just wipe it with a soft, water-dampened cloth
- To prevent fire or shock hazard, do not expose this unit to rain or moisture.
- Do not expose this unit to extremes of temperature.
- Immediately terminate use of the product if the item bulges, smells or leaks.
- Please recharge the Powerbank once a month if not in use to extend the lifetime of the battery.
- Please allow the Powerbank to deplete significantly before recharging in order to preserve the lifetime of the battery.
- Check the voltage of the USB devices and power adaptors carefully before using.
- It is a normal phenomenon that there is a buzzing sound while charging

- Please take out all metal or magnetic things (cases, rings, coin, key, etc.) before using the wireless charging feature.
- Do not place this unit directly onto furniture surfaces with any type of soft, porous, or sensitive finish. As with any rubber compound made with oils, the rubber finish could cause marks or staining where the product resides.
- Lithium batteries, like all rechargeable batteries are recyclable and should be recycled or disposed of in normal household waste. Contact your local government for disposal or recycling practices in your area. They should be incinerated since they might explode.

NOTE: This device uses an internal rechargeable lithium-ion battery. If you suspect your battery may be dead after several attempts to charge, please visit **www.jarvmobile.com** for support.

Never disassemble the unit or attempt to remove the battery as that could cause leakage of an electrolyte substance

FCC WARNINGS

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protections against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment on and off, the user is encouraged to try to correct the interference by one or more of the following measures.

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
